

The Bombing of Al-Shifa Hospital Gate and Int'l Complicity

The Muslim Brotherhood (MB) condemns in the strongest possible terms the heinous premeditated massacre committed by the terrorist Zionist occupation once again, by bombing ambulances that were delivering the injured and wounded in front of the Al-Shifa Hospital, which led to martyring several of them and injuring dozens others.

The Brotherhood also strongly condemns the deliberate simultaneous bombing of the vicinity of Al-Quds Hospital and the Indonesian Hospital, which indicates the intention of the Nazi occupation to target the medical sector in Gaza.

The MB holds the United States and other countries supporting the usurping occupier responsible for these massacres.

The group calls on the Egyptian regime to actively intervene for ensuring the safe transfer of patients and the injured people from Gaza hospitals to Rafah crossing, for receiving medical treatment in Egyptian hospitals.

The Brotherhood also calls on the United Nations and its Security Council to bear responsibility and work to stop the war and ensure protection of the international relief organizations to carry out their humanitarian mission.

The group stresses that these international institutions' failure to fulfil their due roles is a form of complicity and betrayal, as well as undermining of the laws and charters upon which they were founded.
