

Israel's aggression against Yemen brings to mind its arrogance in 1967

The Muslim Brotherhood (MB) condemns the barbaric Israeli aggression against the Republic of Yemen, and the use of excessive force in striking the Yemeni city of Al Hudaydah.

The Brotherhood believes that these attacks bring to mind the Israeli arrogance in 1967, given the occupation's repeated bombing of sites in Syria, Iraq and Lebanon, without any response from here or there.

MB also believes that it is essential to take appropriate action that would raise the cost of this entity's aggression against any Arab country, to deter it from continuing to expand the scope of the war, something that the terrorist Prime Minister Netanyahu seeks, for fear of political accountability for his failure, and criminal accountability for his crimes against humanity.

Meanwhile, the Brotherhood calls for forbidding the use of Arab airspace in attacking a brotherly people and a brotherly country.

MB also calls on the Arab peoples to demonstrate their rage for the sake of Yemen, unite around our nation's key causes, and maintain support for the valiant Palestinian resistance until it achieves its goals of liberating the entire Palestinian territory.

Allah Is the Greatest; and May Praise Be to Allah
